WATERRESISTANT TARPAULIN BAGS

Drybag Travel

Our custom-made DryBags are produced from strong, flexible tarpaulin material made from woven and coated polyester, which make the bags very strong and durable. The seams are welded by means of heatsealing resulting in a bag without stitches. The zippers are also coated, making the bag water-resistant.

Tarpaulin can be made in PMS colours in either a matt or glossy finish. Available options include shoulder straps, handles, and inside pockets. Next to several standard models, the possibilities for customized models are infinite.
More info see: www.drybags.eu

Whether you're going for an outdoor holiday or an extended road trip, the Drybag Travel is the ideal travel companion. This multi-functional bag comes equipped with detachable shoulder straps that can be stored in a special compartment. This makes the Drybag suitable for use as a normal carry-on bag. Along the main zipper is a protective flap that keeps out the water. There are options for extra storage compartments in the bag's interior.

MOQ: 100 in stock PMS colour,
In own PMS colour on request.
