KITCHEN TOWELS**

SEAQUAL® INITIATIVE

Plastic is destroying marine life like never before. The SEAQUAL® INITIATIVE cleans oceans and rivers from plastic. The waste is delivered to processing plants where PET bottles are selected. They are cleaned and shredded to obtain small PET chips.

REHEAT PET

Polyethylene terephthalate (PET) has the ability to be reheated and reused easily. The PET chips are reheated and filtered to remove contamination. The result is chopped in smaller similar resins which is a new recycled raw material.

MAKING SEAQUAL® YARN

The recycled PET resins are used to make high quality Seaqual® Yarn. This yarn is always white. We combine it with recycled cotton to make our SeaTowel and AquaSocks.

TOGETHER WE CAN CLEAN THE OCEANS

WE ARE PARTNER OF THE THE SEAQUAL® INITIATIVE TO MAKE SUSTAINABLE PRODUCTS WITH SEAQUAL® YARN. TOGETHER WE WANT TO FIGHT PLASTIC POLLUTION AND CLEAN OCEANS FROM MARINE LITTER.
