

## Bottlebag Beach

### BottleBag supports the plastic soup foundation

Five cents of each BottleBag goes to the Plastic Soup Foundation.

The PSF stimulates all possible and innovative solutions that contribute to tackling the plastic soup at the source. The plastic that ends up in the environment and ultimately in the ocean has, in their opinion, the greatest impact on the environment and measures must be taken for this. This includes reducing the amount of disposable plastic by consumers, the development of reducing the plastic footprint by companies and coming up with smart solutions for collecting plastic in natural water.

[www.plasticsoupfoundation.org](http://www.plasticsoupfoundation.org)

We start with the recycling of the PET bottles, which would otherwise end on the garbage-dump

The caps and labels will be removed before shredding the bottles

After shredding, the material will be woven into a fiber

The fiber will be reformed to rolls of fabric

This way, the newly made products find their origin in PET bottles

The Bottlebag Beach contains double stitching and piping on the inside of the bag. It causes the bag to have a longer durability and makes it stronger and firmer.

The bag has strong handles made out of 600D rPET polyester. The handles are double stitched to the bag and surround the bag's sides for a stronger grip and a better carrying capacity.

The pouch is available for one colour print, PMS print, all over print or full colour sublimation. The convenient zipper makes sure the bag doesn't fall out once folded and put into the pouch.

The double-sided zipper on the side of the Bottlebag Beach reveals a large, extra compartment. The compartment is reversible and could be turned into the pouch for the Bottlebag. The compartment is on the back of the bag, creating a safe place to store important items. The zipper is made out of recyclable iron instead of plastic.

## 4 different options
