

Bottlebag Pack

BottleBag supports the plastic soup foundation

Five cents of each BottleBag goes to the Plastic Soup Foundation.

The PSF stimulates all possible and innovative solutions that contribute to tackling the plastic soup at the source. The plastic that ends up in the environment and ultimately in the ocean has, in their opinion, the greatest impact on the environment and measures must be taken for this. This includes reducing the amount of disposable plastic by consumers, the development of reducing the plastic footprint by companies and coming up with smart solutions for collecting plastic in natural water.

The BottleBag Pack is developed because this kind of bag is popular amongst children. For example, kids commonly use these bags for swimming lessons or school. We especially want to inform and inspire children to make a change and stop single use of plastic.

The BottleBag pack has drawstrings on each side, which makes it easy to carry on the back or around the shoulder. The stings are made out of cotton. The backpacks are made out of five PET bottles per bag and are easily foldable. The BottleBag Pack is made out of 190T polyester rPET. The size is 47 x 29 cm. The weight is 46 grams.

We start with the recycling of the PET bottles, which would otherwise end on the garbage-dump

The caps and labels will be removed before shredding the bottles

After shredding, the material will be woven into a fiber

The fiber will be reformed to rolls of fabric

This way, the newly made products find their origin in PET bottles

4 different options
