UPCYCLING COTTON

During the production of clothes, there is a lot of waste. We use this waste as a raw material for our products. We have a warehouse filled with colored cotton which is used during our 100% eco-friendly production process.

SORT THE FABRIC

Before shredding the raw materials, we carefully sort the fabrics. We do not use water, paint, bleach or any other chemicals. multiple color fibers. To get the correct color, we mix multiple colored fibers. The mixed fabrics are shredded into pieces multiple times in different machines to obtain small cotton fibers.

DURABLE RECYCLED YARNS

The mixed fabrics are shredded into pieces multiple times in different machines to obtain small cotton fibers. These recycled fibers are our raw materials for our new production. For example, the GoodTowel and GoodSocks are produced using these yarns.

0% PAINT, BLEACH OR OTHER CHEMICALS

THE FASHION INDUSTRY IS ONE OF THE MOST POLLUTING INDUSTRIES. WE USE THE CUTTING WASTE TO MAKE NEW PRODUCTS WITHOUT USING WATER, PAINT, BLEACH, OR OTHER CHEMICALS. BY PRODUCING PRODUCTS THROUGH UPCYCLING COTTON, WE SAVE THOUSANDS OF LITERS OF WATER.
