

100% RECYCLED SOCKS
FROM THE SEA FOR YOU

SEAQUAL INITIATIVE

Fishermen collect plastic they catch during fishing

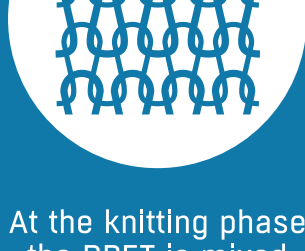

We select PET bottles to recycle

The PET bottles are being converted into small PET chips

We turn the PET chips into new RPET yarn

At the knitting phase the RPET is mixed with recycled cotton

The result is a 100% recycled product

100% RECYCLED MADE OF SEAQUAL-YARN & RECYCLED COTTON

MAKE YOUR OWN DESIGN

The socks can be made in white and one additional color

AquaSocks

Plastic is destroying our marine life like never before. SEAQUAL INITIATIVE in collaboration with NGOs, fishermen and local communities, is helping to clean our oceans of marine litter. The AquaSocks are made with SEAQUAL® YARN containing Upcycled Marine Plastic and supports SEAQUAL INITIATIVE. This combination of Upcycled Marine Plastic with recycled cotton makes the AquaSock a 100% recycled product.

Ocean clean wash

We donate 5% of the profit to the Plastic soup foundation (PSF). The PSF wants to reduce the amount of microplastics in the sea and you can help. With small changes in your washing habits you can reduce the numbers of fibers you shed. Fill up your washing machine to the max and dry spin on low revs. Use washing liquid instead of powder and use fabric softener. Wash at low temperature and avoid long washing. www.oceancleanwash.org

AquaSocks come with a unique header card

**50% SEAQUAL-YARN
50% RECYCLED COTTON**

Product:	AquaSocks
Size:	36/40 & 41/45
