

Drybag Duffel

Our custom-made DryBags are produced from strong, flexible tarpaulin material made from woven and coated polyester, which make the bags very strong and durable. The seams are welded by means of heatsealing resulting in a bag without stitches. The zippers are also coated, making the bag water-resistant.

Tarpaulin can be made in PMS colours in either a matt or glossy finish. Available options include shoulder straps, handles, and inside pockets. Next to several standard models, the possibilities for customized models are infinite.

More info see: www.drybags.eu

The duffel Drybag is made out of strong tarpaulin. The seams are welded by means of heat-sealing so there aren't any stitches needed during the process. The zippers are also coated which will result in a water-resistant bag. In this bag has space for 30L. Measurements: 61x27. MOQ: standard colour 100. Please ask for the possibilities of your own PMS colour.
